

Mechanical Breakdown Insurance

Vehicle Categories as at 23 May 2019

This applies to all MBI policies underwritten by DPL Insurance Limited processed through Generator.

Vehicle Categories

- Vehicle category is a group of vehicles, which have similar average cost of repairs, as well as the frequency and severity of mechanical and electrical faults and failures that occur.
- The actual vehicle category is determined by Generator, as it is an important factor for determining the insurance premium of the vehicle.
- These lists are not exhaustive and are intended to be used as a guide only. The vehicle makes and models are based on the best publically-available information at the time. Where a manufacturer has renamed a make or model, we use the current name.
- Autosure reserves the right, at its sole discretion, to change, add or remove all or any vehicles included in these lists, at any time without notice.

QUALIFYING VEHICLES

Category 1: All vehicles not included in categories 2, 3, 4, 5 and 6.
